

Larson Texts Internships for College Students (Including Tuition Assistance)

- Our interns are math majors at one of the colleges in the Erie area.

- Some companies ask their interns to work for free. Our interns receive a competitive hourly wage. Our interns typically work between 15 and 20 hours per week (more during college breaks). During the summer our interns typically work 40 hours per week.
- The work consists of helping with the production of our mathematics texts by proofing examples, solving exercises, and working as an online tutor at www.CalcChat.com.
- Interns who work at least 1000 hours per year are eligible for tuition assistance of up to \$5,000. To qualify for this assistance, an intern must be a full-time student at an accredited college and must have a cumulative grade-point average of at least 3.0.
- Upon graduation, interns who accept full-time employment with Larson Texts qualify for an additional annual tuition reimbursement of up to \$5,000.

For details about our Tuition Assistance Program, [click here](#).

To apply for an internship with Larson Texts, submit your
resume and transcripts to:
